

ASSESSMENT OF MARGINAL WORKERS IN TAMILNADU

Phrase 1: problem definition and design thinking

Problem definition:

The project involves analyzing the demographic characteristics of marginal workers in Tamil Nadu based on their age, industrial category, and sex. The objective is to perform a socioeconomic analysis and create visualizations to represent the distribution of marginal workers across different categories.

Design Thinking:

1. Project Objectives: To define the objectives such as analyzing marginal worker demographics, understanding age and gender distribution, and exploring industrial categories.
2. Analysis Approach: To plan the steps to extract, clean, and analyze the dataset to derive insights.
3. Visualization Selection: Last step is to determine suitable visualization types to represent demographic distributions in effective manner.
